THERMOFORMING MACHINES

## Technical characteristics

Machine lenght	Completely customized	Pneumatic feeding (Average consumption)	Completely customized
Machine width	Completely customized	Electrical components	Completely customized
Machine height (Luminous turret excluded)	Completely customized	Mechanical components	Completely customized
Loading Area	Completely customized	Pneumatic components	Completely customized
Loading Area height	Completely customized	Vacuum system components	Completely customized
Machines weight (Vacuum pump excluded)	Completely customized		
Control panel height	Completely customized		
Lower film standard width	Completely customized		
Feeding max. step	Completely customized		
Feeding max. depth	Completely customized		
Film reel core diameter	Completely customized		
Lower film reel max. diameter	Completely customized		
Upper film reel max. diameter	Completely customized		
Costruction	Completely customized		
Control / command system	Completely customized		
Control / command interface	Completely customized		
Feeding system (Drive)	Completely customized		
Installed system (Pumps excluded)	Completely customized		
Protection degree IP / NEMA	Completely customized		

## Packaging

Production capacity	Completely customized
Application	Completely customized
Lower film for RIGID packages	Completely customized
Lower film for FLEXIBLE packages	Completely customized
Upper film for FLEXIBLE packages	Completely customized

## Why you should choose it

The VKF110 is the most advanced and fully customisable solution in the range, designed for companies requiring the ultimate in efficiency, automation and versatility. Thanks to its modular structure and the possibility of integrating a wide range of accessories and technologies, it adapts perfectly to any production line, guaranteeing optimal packaging for any type of product.

Equipped with intelligent control systems, advanced temperature and absolute precision in forming and cutting, the VKF110 ensures the highest quality and uniformity of packaging. It is designed to handle high production volumes without compromising safety, hygiene and reliability.

Whether for food, medical products or consumer goods, the VKF110 is the ideal thermoforming machine for those who want a tailor-made machine built to meet the challenges of modern industrial production.
