THERMOFORMING MACHINES

## Technical characteristics

Machine lenght	from 7435 to 21435 with step of 600 mm	Pneumatic feeding (Average consumption)	2500 NI/min
Machine width	1190 ÷ 1390 mm	Eletrical components	Siemens, Toshiba, ABB, Sick, Phoenix Contact
Machine height (Luminous turret excluded)	1970 mm (± 50 mm)	Mechanical components	Rossi Motoriduttori, Minimotor, Siemens, Iwis, SKF, Igus
Loading Area	Accordind to user's needs	Pneumatic components	Festo, Parker
Loading Area height	Completely customized	Vacuum system components	Omal, Valvaut, Maros Engineering, Trelleborg
Machines weight (Vacuum pump excluded)	from 2500 Kg		
Control panel height	1500 mm (± 50 mm)		
Lower film standard width	Completely customized		
Feeding max. step	1200 mm		
Feeding max. depth	220 mm		
Film reel core diameter	3" (70 ÷ 76 mm)		
Lower film reel max. diameter	500 mm		
Upper film reel max. diameter	400 mm		
Costruction	STAINLESS steel Aisi 304		
Control / command system	PLC and Touch Screen 12"		
Control / command interface	HMI Simatic Siemens - Windows CE		
Feeding system (Drive)	Brushless Motor		
Installed system (Pumps excluded)	20-40 kW - 440 V - 50/60 Hz - 3P + N + GND		
Protetiones degree IP / NEMA	IP 66 / NEMA 4		

## Packaging

Production capacity	up to 22 cycles / min.
Application	Sealing - Skin - MAP - Vacuum
Lower film for RIGID packages	PET - PVC - PS - PP
Lower film for FLEXIBLE packages	PA - PP - Paper - Alu
Upper film for FLEXIBLE packages	PA - PP - Paper - Alu - Tyvec - Skin

## Why you should choose it

The VKF90 is the ideal thermoforming packaging machine for those who require high performance and maximum production efficiency. Designed to guarantee a fast and precise processing cycle, this machine combines advanced technology and reliability for the packaging of food, medical and industrial products.

Thanks to its intelligent control systems and optimised temperature and cutting area, it ensures a flawless result on all types of material. Its robust construction, combined with the possibility of integrating accessories and customization, makes it perfect for companies looking for a scalable, high-performance solution.

The VKF90 is designed to minimise downtime and production waste, ensuring operational continuity and consistent quality. A safe investment for those who want the most from their packaging process.
